Languages

Spanish

Committed and diligent iO Academy student set to graduate in August 2024, eager to start my first software development role. In my spare time you can find me on runs with friends, at the gym or baking.

Projects

At iO Academy I have worked on a variety of projects, both individual and as part of a scrum team. Some of my favourites are below, but all projects can be found on my GitHub.

PHP Music Player

 <https://2024-may-sde-music-player-uwu-shruwu.dev.io-academy.uk/index.php>

My most recent project is a Spotify-inspired player that uses PHP to fetch and manipulate an SQL database to display songs, artists and albums, as well as favourite songs to display on an allocated page

React Invoice Manager

 <https://2024-may-sde-invoicing-sloth-rockets.dev.io-academy.uk/>

Using React and a prebuilt API, we built the front-end for invoice management software. Based on a supplied design, we built pages integrated with the API provided to fetch and manipulate the API data in order to create and process invoices. We used Tailwind for styling.

Experience

Abode Property Management

July 2021-May 2024

Property Manager

Bristol

Before starting at iO Academy, I worked in property management for 5 years. My most recent role was at Abode, where I managed a portfolio of 250 properties, overseeing everything from inventories to major renovations. I gained valuable people management, communication, and time management skills.

Hancock and Bentley

January 2020-June 2021

Property Manager

Leeds

Complete 360 management of a portfolio of around 500 properties in a team of 3.

Education

University of Leeds

September 2013 - June 2018

Philosophy, Ethics and Religion

BA(Hons) International

First Class

In my degree I was first introduced to formal logic, using the same principles as programming. As part of my degree I spent a year studying in Madrid, where my communication and my Spanish skills greatly improved.
